University of Illinois, 2006

Professional  
Experience

Project Responsibility

**Kathleen Suzanne Wishard, RLA, LEED AP, ASLA**  
Associate and Senior Project Manager

Kathleen Wishard is a licensed landscape architect with over 12 years of professional experience in design and construction of landscape design projects. Kathleen received a Master of Landscape Architecture degree from the University of Illinois with a focus on sustainable design. Her experience includes project work for clients encompassing design of park and public realm spaces; recreation, trail and natural resource systems; inventive water infiltration gardens; a variety of LEED rated projects; and high end residential design. Often assuming project manager roles, she functions on projects in all phases from site analysis and conceptual layout, through master planning, detailed design, and implementation. Kathleen is LEED accredited and focuses on sustainable design assessment efforts.

As a Project Manager at LRM Landscape Architecture, Kathleen has led several urban revitalization developments including the Del Amo Mall improvements, Bluffs at Playa Vista, a creative campus in El Segundo, Circa in downtown Los Angeles, 777 Aviation in El Segundo, and most recently the Trillium Courtyard renovation. Earlier in her career, as an associate at the Los Angeles based firm AECOM, she worked on a diverse range of public and private projects such as the Echo Park Lake Rehabilitation Project, NBC Universal Village, Metro Eastside Access and waterfront redevelopment projects in San Pedro. She is a highly organized individual and able to deliver products on budget, able to establish and adhere to project schedules, orchestrate consultant activities, and effectively respond to client needs. These attributes are the fundamentals of her strengths but is a talented designer in her own right.

Kathleen will serve as LRM's Project Manager and will be the project point person responsible for direct interface with the client and the project team. Kathleen will regularly interface with LRM's design principals David Larkins and Charles Elliott and not only contribute to the creative process but also bring her vast knowledge of sustainable practices to the team.
